

Garage Fans

Particular characteristics of the MAFG series:

- Two fans connected in series with a flow straightener
- Casing of sheet steel hot dip galvanized or painted with welded flanges
- Impellers made from aluminium or plastic
- Low-maintenance squirrel cage motors to IP 55
- Direct driven with conventional foot motor B3
- Variable execution, 2-step speed variable, stepless by frequency converter
- A variety of accessories like, connectors, feet, dampers etc.
- Special fans for specific applications, e. g. for higher media flow and ambient temperatures, with improved corrosion protection, with sealed housing parts, for special voltage and frequency.

MAFG applications:

- Ventilation of garages
- Ventilation of rooms/buildings
- Exhaustion of gases and vapors
